

APPROVED MEDICAL SOLUTIONS™

Introducing **ClearDetox Pro®** is the only patented, professional-strength, water-soluble zeolite detox dietary supplement and is only available to healthcare professionals and their patients.

Heavy metals, environmental toxins, and pollutants are all around us. In the air we breathe. In the foods we eat. In the water we drink.

Most of the environmental toxins, including heavy metals, are **water soluble, which means that these toxins are absorbed into our bodies and are distributed to several compartments and organs in our bodies.** These heavy metals and toxins drive cellular dysfunction and are a contributing factor to why people do not feel well [1], [2], [3], [4].

Zeolite clinoptilolite (sodium aluminosilicate), a mineral formed over time after volcanic lava meets sea water, has the capability to **attract and retain heavy metals and several other toxins**[5], [6].

Over the past several years, multiple zeolite clinoptilolite powders and water suspension formulations have been made available in the U.S. **The zeolite clinoptilolite crystal in all these formulations is not water-soluble; these formulations have very little to no bioavailability.**

The low bioavailability problem of the zeolite clinoptilolite has finally been solved. Dr. Nikolaos Tsirikos-Karapanos (triple Board Certified; Pharmacist, Medical Doctor, Cardiovascular Surgeon), President of Metron Nutraceuticals [7] **created ClearDetox Pro, the only patented, professional-strength, water-soluble zeolite detox dietary supplement** [8], [9], [10].

ClearDetox Pro® is a true binder of heavy metals and other environmental toxins. Taken daily by mouth, can support the human body by offering systemic detoxification* daily*.

What makes **ClearDetox Pro®** unique?

- The only water-soluble and nanosized zeolite dietary supplement.
- The only zeolite that can support its claim that has the capability of crossing cellular membranes after the conduction of the appropriate scientific study.
- The only triple-patented detox dietary supplement.
- The only detox dietary supplement that is tested for of sixty-nine (69) Elemental Impurities (i.e., free metals).
- The only detox dietary supplement created by a Triple Board-Certified Pharmacist, Medical Doctor, Cardiovascular Surgeon
- Produced in the US at an FDA Registered and Inspected facility.
- The only detox dietary supplement tested with standards that exceed the FDA/ cGMP standards for dietary supplements.

60 Servings

ClearDetox Pro® is produced in the USA, in a FDA Registered and FDA Inspected facility.

The water-soluble zeolite in **ClearDetox Pro®** is the cleanest zeolite available. Every batch of water-soluble zeolite produced is tested for the presence of **sixty-nine (69)** Elemental Impurities (i.e., free metals). Additionally, every batch of **ClearDetox Pro®** produced is tested for the presence of **twenty-nine (29)** Elemental Impurities (i.e., free metals). This extensive testing for Elemental Impurities exceeds by far the FDA/cGMP standards for both dietary supplements and pharmaceutical products. The FDA/cGMP standard of testing for Elemental Impurities in liquid formulations is four (4) metals for dietary supplements, and **twenty-four (24)** metals for pharmaceutical products.
